Summary

Business Analyst and AI Product Manager with experience in high-growth technology environments, skilled at gathering business requirements, designing user stories and workflows, and conducting UAT for continuous improvement. Led cross-functional teams to deliver six AI-powered features that reduced manual effort by 40% and implemented AI-driven data automation, cutting analysis time by 30%. Adept at partnering with engineering and client stakeholders to drive strategic AI-enabled product innovation.

EDUCATION

NUST ISLAMABAD

Sep 2022 - Present

Bachelors, Economics

- **Coursework:** AI Product Management, Artificial Intelligence Fundamentals, Data Analytics, Business Strategy, Statistics for Decision Making, Machine Learning Concepts, Python for Data Science

EXPERIENCE

Think Agents

Jun 2024 - Present

AI Product Manager

Islamabad, Pakistan

- Spearheaded the AI product roadmap, using Mixpanel analytics and cross-functional collaboration to align automation initiatives with client acquisition and retention goals, resulting in clearer strategic alignment that supported acquisition and retention objectives
- Designed and delivered AI automation workflows using N8N, Make.com, and OpenAI API, reducing manual effort by 40% and increasing qualified leads by 25%.
- Drove the end-to-end product lifecycle-conducted market research, designed MVPs in Notion, and iterated improvements using AI evaluation metrics and model evaluation frameworks and user feedback, which enhanced product relevance and user satisfaction
- Led cross-functional product delivery with engineering and client teams to deliver 6+ AI-powered features that increased adoption and retention by 30%

First Woman Bank

Apr 2025 - Nov 2025

Business Analyst

Abbotabad, Pakistan

- Analyzed financial and customer datasets using Excel and AI-assisted analytics tools to identify behavioral patterns and growth opportunities.
- Designed and implemented AI-powered data automation to streamline reporting workflows using collaboration tools like Jira and Notion, reducing analysis time by 30%
- Supported digital transformation initiatives and cross-functional product delivery, translating data insights into strategic recommendations for leadership teams
- Applied AI-driven model evaluation and analytical reasoning using Python and Mixpanel to create data-informed product concepts, contributing to the AI Product Management roadmap and improving decision-making speed

PROJECT

Personal AI Data Analyst – Automated Business Insights Platform

- Defined product requirements and success metrics for an AI-driven decision support system enabling self-serve analytics for non-technical stakeholders.
- Designed and orchestrated an end-to-end AI data pipeline (Python, SQL) covering ingestion, EDA, and LLM-based insight summarization.
- Implemented automation and evaluation workflows to ensure consistent, reliable AI outputs while eliminating manual reporting dependencies.
- Translated AI-generated insights into actionable business recommendations, directly supporting data-informed product and growth decisions.

Timelens (AI-Powered Image Transformation Tool)

- Directed the end-to-end product lifecycle of an AI transformation tool leveraging Gemini 2.5 Flash for context-aware image outputs.
- Spearheaded integration of user analytics and feedback systems to enhance engagement and model precision.
- Collaborated cross-functionally to define KPIs and scale AI infrastructure for performance optimization.
- Implemented ethical AI and product governance frameworks ensuring responsible deployment and data transparency.

TECHNICAL SKILLS

- **AI Tools:** OpenAI API, Gemini 2.5, N8N, Make.com, Lang Chain, Hugging Face
- **Technical Expertise:** Python, SQL, API Integration, Data Modeling, Automation (Zapier, Google Sheets)
- **Product Tools:** Jira, Product board, Notion, Trello, Mixpanel, Amplitude, Collaboration Tools
- **Methodologies:** Agile, MVP Design, AI Evaluation Metrics, User Research, Model Evaluation, Business Analysis, Digital Transformation, Cross-functional Product Delivery
- **Soft Skills:** Leadership, Communication, Cross-functional Collaboration, Strategic Thinking, Cultural Competency, Bilingual Proficiency
