## EDUCATION

### NUST ISLAMABAD

Bachelors of Economics

Sep. 2022-Present

**Relevant Courses:** AI Product Management, Artificial Intelligence Fundamentals, Data Analytics, Business Strategy, Statistics for Decision Making, Machine Learning Concepts, Python for Data Science

## EXPERIENCE

### Founder & Technical Project Lead

Think Agents

June 2024 – Present

Islamabad, Pakistan

- Spearheaded the AI product roadmap, aligning automation initiatives with client acquisition and retention goals.
- Designed and delivered AI automation workflows using N8N, Make.com, and OpenAI API, reducing manual effort by 40% and increasing qualified leads by 25%.
- Drove the end-to-end product lifecycle — from market research and MVP development to iterative improvement based on user feedback.
- Partnered with engineering and client teams to deliver 6+ AI-powered features that increased adoption and retention by 30%.

### Business Analyst

Bank of Alfalah

Apr. 2025 – Nov. 2025

Abbotabad, Pakistan

- Analyzed financial and customer datasets using Excel and AI-assisted analytics tools to identify behavioral patterns and growth opportunities.
- Designed and implemented AI-powered data automation to streamline reporting workflows, reducing analysis time by 30%.
- Supported digital transformation initiatives, translating data insights into strategic recommendations for leadership teams.
- Strengthened expertise in AI-driven problem solving, analytical reasoning, and data-informed product thinking foundational to AI Product Management.

## PROJECT

### ScalrPay E-Commerce Platform

- Spearheaded the development of an AI-driven creator platform, integrating automation and analytics to optimize digital product performance and user growth.
- Defined and executed the product roadmap, aligning automation, analytics, and user acquisition strategies to enhance creator monetization.
- Directed cross-functional collaboration between engineering, design, and data teams to deliver scalable, insight-driven features.
- Collaborated with cross-functional teams to align AI-driven analytics features with user feedback, enhancing platform adoption by 25%.

### Timelens (AI-Powered Image Transformation Tool)

- Directed the end-to-end product lifecycle of an AI transformation tool leveraging Gemini 2.5 Flash for context-aware image outputs.
- Spearheaded integration of user analytics and feedback systems to enhance engagement and model precision.
- Collaborated cross-functionally to define KPIs and scale AI infrastructure for performance optimization.
- Implemented ethical AI and product governance frameworks ensuring responsible deployment and data transparency.

## TECHNICAL SKILLS

**AI Tools:** OpenAI API, Gemini 2.5, N8N, Make.com, Lang Chain, Hugging Face

**Technical Expertise:** Python, SQL, API Integration, Data Modeling, Automation (Zapier, Google Sheets)

**Product Tools:** Jira, Product board, Notion, Trello, Mixpanel, Amplitude

**Methodologies:** Agile, MVP Design, AI Evaluation Metrics, User Research

**Soft Skills:** Leadership, Communication, Cross-functional Collaboration, Strategic Thinking
